

Ten frames

Section 7: Counting on and back to 20 – looking at the structure

The next step is to look at two tens frames to make 20. Position the frames next to each other (not touching), as shown below.

The horizontal frame has rows of 5. Children will be introduced to counting in 5s and 10s in Key Stage 1.

The vertical ten frame shows complete sets of 10.

It is important to show the children both orientations of the ten frames.
