

## Ten frames

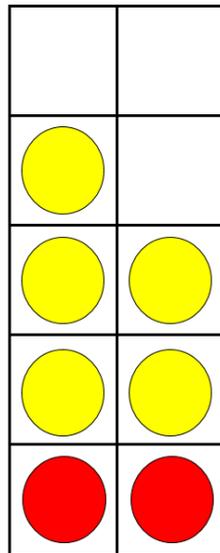

### Section 17: Activity 5

Show your children an arrangement of spots on your ten frame.

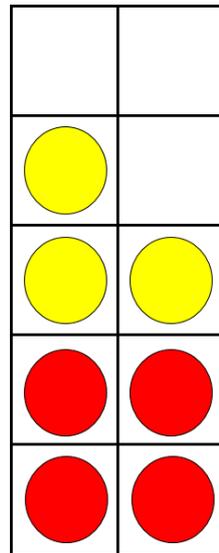

Ask them to find all the different ways of making the target number using their two coloured counters.

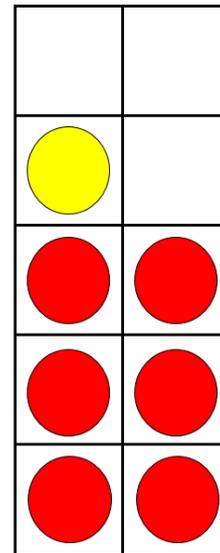

$$4 + 3 = 7$$

$$2 + 5 = 7$$

$$4 + 3 = 7$$

$$6 + 1 = 7$$

You may ask the children to formally record their work by writing number sentences.

Another way of recording their work quickly is to give the children smaller versions of the tens frames and 2 contrasting coloured Bingo dabber pens.

There are two resource sheets as part of this pack.

1. Large ten frame suitable for counters
2. Large twenty frame suitable for counters
3. Smaller tens frames suitable for recording answers
4. Small twenty frame suitable for recording answers
